

TRANSPORTATION SERVICES

Excellence Through Teamwork

ADC's extensive experience and large fleet of satellite controlled trucks combine to provide you with a customized solution for your unique transportation needs. Whether you need a full spectrum of services or a solution for just one or two areas, we will work with you to tailor the most efficient and cost-effective program for your specific requirements.

Fully Managed Transportation Services

We all have limited resources to accomplish our goals. Using ADC to professionally manage all of your transportation requirements is the ideal way to allow you to focus your resources on what you do best.

- **Ensure the Best Cost Pricing** - Our experienced transportation professionals know how to get the best pricing for your specific needs. Whether using our own trucking network or another carrier's resources, we can often get you better pricing than you can get on your own.
- **Lower Your Overall Costs** - We will efficiently manage your high use transportation lanes and, by pooling on the "back-haul," lower your overall costs.
- **Track Your Loads; Manage Your Costs** - Our state-of-the-art transportation software and satellite tracking allows us to easily and conveniently track your loads and let you know when your freight will be delivered.
- **Manage Your Inbound Domestic Freight** - We will receive and inventory your freight in our secure warehouse and precisely prepare your orders for shipment.

Pooled Transportation and B2B Distribution Services

ADC will meet your delivery specifications, manage your bulk-loaded orders, and effectively consolidate and ship your LTL shipments.

- **Control Your Sequential Routing and Delivery Requirements** - Whether your products require local delivery or long haul, we can sequentially route and deliver based on your specific service requirements.
- **Easily Manage Your Bulk-Loaded Retail Orders** - We'll receive your bulk loaded retail orders for regional distribution, sort them according to your requirements, verify the data and quickly deliver them to your retail distribution points.
- **USPS Dropshippers Co-load and Re-direct Partial Loads** - We will co-load your LTL shipments to USPS facilities or other hub destinations and redirect your partial loads in a

services.

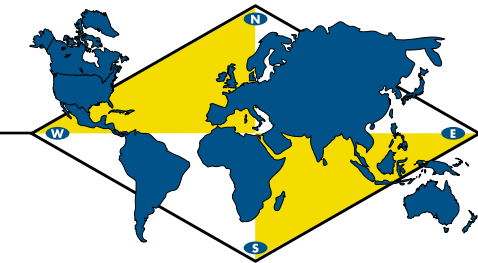

more efficient manner. We go to more than 690 DDU Zip Code locations for direct entry at the DDU level.

Domestic Ground, Air and Freight Forwarding

Our transportation professionals will manage your domestic ground and freight forwarding needs through our established network relationships and state-of-the-art systems.

- Choose from a Full Range of Domestic Ground and Air Options - We offer a variety of domestic ground and air transportation options to give you an optimal solution for your shipping requirements.
- Customize Your Freight Forwarding Program - Whether long haul or local delivery, we will handle all of the complex details of your freight forwarding and track it every step of the way.
- Ensure Quality and Safety with Each Delivery – We control and monitor each shipment and delivery with our locally owned network of satellite controlled trucks in 7 states.
- Take Advantage of Load Size Flexibility - We provide customized options for full truckload and LTL.

International Ocean and Air Freight

ADC proactively manages your international shipments every step of the way, moving freight from any point in the U.S. to any international port or inland destination.

- Ship Full or Less than Full Container Loads - We will manage the movement and delivery of all your international ocean freight, moving full containers (FCL) or less than full container loads (LCL).
- Avoid Customs Delays and Challenges - We provide a full range of Customs Brokerage Management Services for hassle-free freight clearance.
- Efficiently Control International Air Freight - We'll manage your air freight when you have international shipments that require faster delivery times on a space available or guaranteed position basis, depending on your time requirements.
- Manage Your Inbound International Freight - We will carefully receive and hand unload your containers in our secure warehouse. Then we will precisely prepare your B2C orders for shipment.
